VoipKey is software that allows you to place calls right from your computer. You can call your friends and family anywhere they are !

You can make two types of calls with our VoipKey:

- Pc2Phone: Call to any regular phone right from your PC.
  - Pc2Pc: Call from your PC to another PC for free.
- 
- The Software is already configured. You don't have to change anything except the Username, Authorization Name and Password
  - Once you register on our Website we shall give you an Username to use and a Password.
  - For Display Name you can user whatever you want.
  - The server must be it.xk.vox.sm and Port 5060

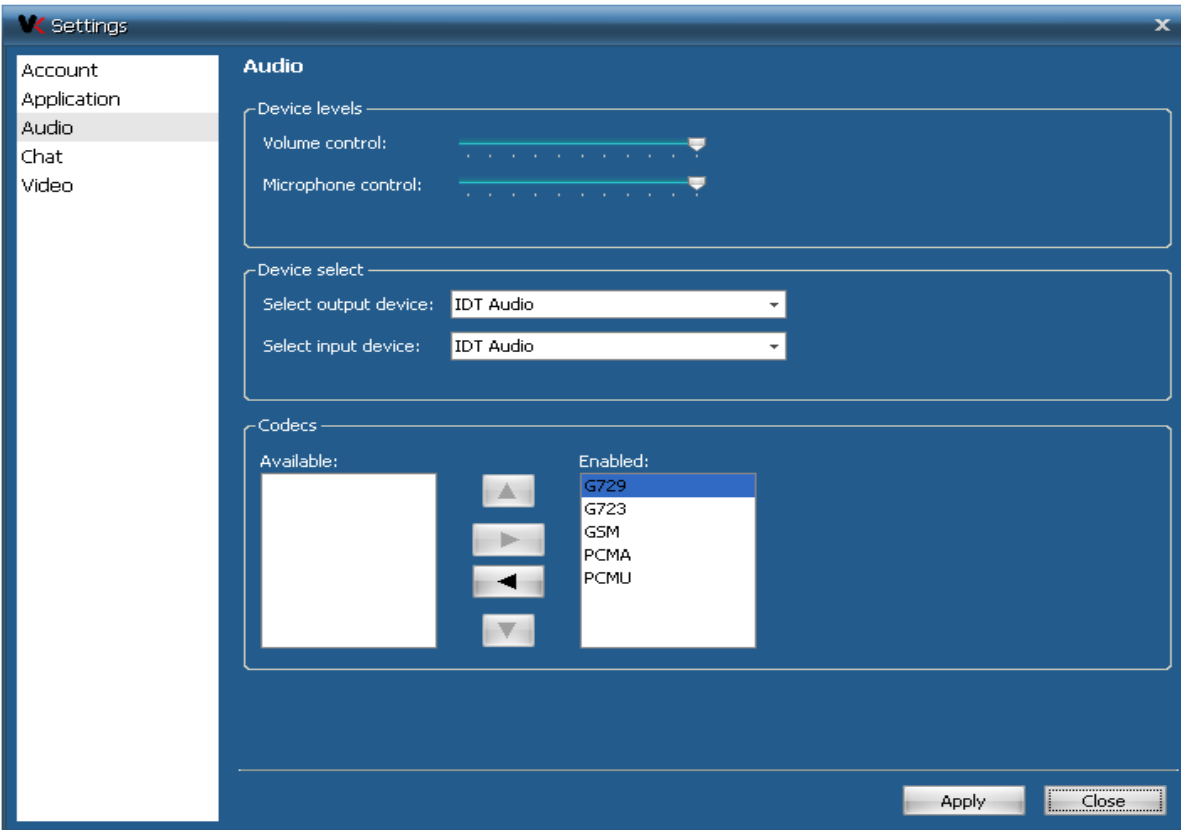

- On Contacts Tab you can save your Contacts name, email, messenger ID, mobile and home number

- To Dial a number just use the Dialer Tab. When you dial a number don't forget to use the Country Prefix too.  
**Eg:** Romania Mobile: 004072345xxxx
- Our Pc2Phone Software provides you the best solution to place a call using your Personal Computer
- It can be used even with Internet Connection provided from an Internet Key.

- We support the most important Codecs and before you start using our software don't forget to set up the proper Output & Input Audio Device.

VoipKey works with most PCs running Windows 95, 98, Me, 2000, XP and Windows Vista & 7. A sound card, speakers and a PC microphone are also required.

### To improve your Calls

For best performance we recommend that you use a headset when making calls.

Please don't hesitate to contact us if you need help.
